## DNV APPROVAL CERTIFICATION!

EUROMERE developed isoNPG EUROGEL HQ-200 series and Low Styrenated Content isoNPG EUROGEL HQ-200 FTS series to answer the specific needs from Marine and/or Swimming Pools customers. Several years after market introduction, these products are in use at various customers worldwide.

We're very pleased with these ranges starting High Properties in demanding environment and easy to use property in every workshop.

**Today we received DNV Approval certification for EUROGEL® HQ-200 series and EUROGEL® HQ-200 FTS series** for use in marine vessels in accordance with stated Rules/Standards as well as the agreement to use on all vessels classed by DNV.

This is a new step forward for these products.

We do hope that you'll be interested to know more about these ranges.
